

Welcome to Ageless Peptides

Your Trusted Peptide Partner

Welcome to Ageless Peps... a U.S. and internationally based **peptide science company** providing over 150+ clinical, pharmaceutical grade peptides for clinics and patients who understand the long-term health and wellness benefits of peptides. Ageless Peps also provides unmatched education and specific protocols of peptides used in real world clinical applications for both U.S and International clinics.

Our peptides are meticulously formulated and produced in the United States, with purity levels exceeding 99%+. We even offer peptide strength variations, Internationally compounded for specific peptide protocols. Our peptide supply chain partners include U.S based, licensed independent labs and FDA 503 lab partners ensuring safe, tested clinical peptides.

Our expert team has over twenty years of peptide and dietary supplement manufacturing adhering to strict **CGMP manufacturing practices and reliability**. Every peptide has a **Certificate of Analysis** to review before it is purchased right on our website.

Full Panel C of A Testing & Verification:

- 99%+ Purity Guaranteed
- Triple Third-Party Testing (or Independent Third-Party Tested)
- Batch-Specific Certificates of Analysis
- HPLC Verified (High-Performance Liquid Chromatography)
- Sterility Tested
- Endotoxin Tested
- Heavy Metals Screened
- Bacteria/Contaminant Screened

Testing Partners:

- U.S Independent labs
- U.S CLIA certified labs (Clinical Laboratory Improvement Amendments)
- U.S ISO testing (gold standard)

Manufacturing & Compliance:

- USA GMP Manufacturing Process
- ISO Facilities
- cGMP Compliant
- Full Chain of Custody Documentation

Service & Delivery:

- Same-Day Shipping
- 2-4 Day Delivery

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

WEIGHT LOSS & METABOLIC PEPTIDES

GLP-1 SG Vial

Mechanism: GLP-1 receptor agonist that suppresses appetite and promotes weight loss.

Benefits: Suppresses appetite, improves glycemic control, and facilitates sustained weight reduction.

- 5 mg
- 10 mg
- 15 mg
- 20 mg
- 30 mg

GLP-2 TZ Vial

Mechanism: GLP-2 Dual agonist peptide that mimics GIP and GLP-1.

Benefits: Provides superior weight reduction, improved glycemic control, and improves lipid metabolism.

- 5 mg
- 10 mg
- 15 mg
- 20 mg
- 30 mg
- 60 mg

GLP-3 RT Vial

Mechanism: GLP-3 Triple agonist that targets GLP-1, GIP, and glucagon receptors.

Benefits: Promotes superior weight reduction, glycemic stabilization, and metabolic reprogramming.

- 5 mg
- 10 mg
- 15 mg
- 20 mg
- 30 mg
- 60 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

WEIGHT LOSS & METABOLIC PEPTIDES

WEIGHT LOSS FAST MELTS GLP-1 – CHOCOLATE

Safe, Non-drug GLP-1 Fast Melt formulated to mimic how GLP-1's work in the body without any side effects. Works three ways for weight loss and weight prevention.

- Works on the natural hormone Leptin for effective, appetite suppression and metabolic control.
- Works on thermogenic fat burning
- Works on burning adipose fat and shrinking fat cell size

WEIGHT LOSS FAST MELTS GLP-1 – CARAMEL

Safe, Non-drug GLP-1 Fast Melt formulated to mimic how GLP-1's work in the body without any side effects. Works three ways for weight loss and weight prevention.

- Works on the natural hormone Leptin for effective, appetite suppression and metabolic control.
- Works on thermogenic fat burning
- Works on burning adipose fat and shrinking fat cell size

WEIGHT LOSS FAST MELTS GLP-1 – MANUKA HONEY

Safe, Non-drug GLP-1 Fast Melt formulated to mimic how GLP-1's work in the body without any side effects. Works three ways for weight loss and weight prevention.

- Works on the natural hormone Leptin for effective, appetite suppression and metabolic control.
- Works on thermogenic fat burning
- Works on burning adipose fat and shrinking fat cell size

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

WEIGHT LOSS & METABOLIC PEPTIDES

AOD-9604 Vial

Mechanism: HGH fragment stimulating lipolysis without affecting blood sugar.

Benefits: Promotes targeted fat loss, supports metabolic efficiency.

5 mg

10 mg

CAGRILINTIDE Vial

Mechanism: Modulates appetite and overall metabolic function.

Benefits: Used in combination protocols to enhance satiety and support sustained weight management synergy.

5mg

10mg

5-AMINO – Vial

Mechanism: NNMT inhibitor increasing NAD+ for fat oxidation.

Benefits: Supports weight loss and metabolic health.

10 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

WEIGHT LOSS & METABOLIC PEPTIDES

5-AMINO 1MQ – 60 Capsules

Mechanism: NNMT inhibitor increasing NAD+ for fat oxidation.

Benefits: Supports weight loss and metabolic health.

50 mg

SLU-PP-332 – 500mcg, 60 Capsules

Cellular Energy • Metabolic Wellness • Mitochondrial Support

SLU-PP-332 is an advanced research peptide being explored for its role in cellular energy regulation and metabolic signaling pathways. It is commonly studied by those seeking to support metabolic efficiency, endurance-related pathways, and sustained energy production.

500 mcg

ADIPOTIDE Vial

Adipotide (often called FTPP — FatTargeted Proapoptotic Peptide or ProhibitinTargeting Peptide 1) is an **experimental synthetic peptide** designed to **selectively eliminate fat tissue by targeting its blood supply.**

• It is a **chimeric peptide** with two distinct functional parts:

1. A **homing sequence** that binds to receptors on blood vessels supplying white adipose tissue.
2. A **proapoptotic (celldeath) sequence** that triggers programmed death of those targeted cells.

5 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

WEIGHT LOSS & METABOLIC PEPTIDES

MAZDUTIDE

Mechanism: Tripeptide derived from alpha-MSH that inhibits NF-kappa B.

Benefits: Reduces inflammation, especially in the gut, and promotes wound healing.

10 mg

SURVODUTIDE Vial

Survodutide (also known as BI 456906) is a synthetic peptide peptide agonist engineered to act on two key hormone receptors:

- **GLP1 receptor (GLPIR)** — involved in appetite control, insulin secretion, and glucose regulation
- **Glucagon receptor (GCCR)** — involved in energy expenditure, fat oxidation, and liver metabolism

10 mg

TESOFENSINE – 60 Capsules

Triple monoamine reuptake inhibitor (SNDRI) that increases dopamine/serotonin/noradrenaline.

Benefits: Induces strong appetite suppression, supports weight loss, and enhances cognition.

500 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

GROWTH HORMONE (GH) PEPTIDES

TESAMORELIN Vial

Mechanism: FDA-approved GHRH analog that stimulates GH secretion.

Benefits: Potently reduces visceral abdominal fat, enhances GH release, and supports muscle growth.

5 mg

10 mg

TESAMORELIN / IPAMORELIN Blend

Gold standard growth hormone stack pairing Tesamorelin (GHRH) and Ipamorelin (GHRP).

Benefits: Maximizes endogenous GH release, supporting fat loss, muscle growth, and recovery.

10/5 mg

CJC-1295 NO DAC Vial

Mechanism: Short-acting GHRH analog (MOD-GRF-1-29) that mimics natural pulsatile GH release.

Benefits: Stimulates endogenous GH secretion, often combined with GHRPs for muscle growth and fat loss synergy.

5 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

GROWTH HORMONE (GH) PEPTIDES

CJC-1295 NO DAC / IPAMORELIN Blend

Synergistic blend pairing CJC-1295 NO DAC (a GHRH) with Ipamorelin (a selective GHRP).

Benefits: Amplifies GH release, promoting muscle growth, fat loss, and recovery.

5/5 mg

IPAMORELIN Vial

Mechanism: Selective GHRP that binds to the ghrelin receptor to release GH.

Benefits: Promotes muscle growth/fat loss, enhances sleep, and improves recovery without raising cortisol.

5 mg

10 mg

SERMORELIN – 60 Capsules

Mechanism: FDA-approved GHRH analog that binds GHRH receptor.

Benefits: Increases endogenous GH release, supports muscle growth, fat loss, and recovery.

500 mcg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

GROWTH HORMONE (GH) PEPTIDES

HCG – 5000 IU Vial

Mechanism: Hormone that mimics Luteinizing Hormone (LH).

Benefits: Stimulates testosterone/sperm production in testes, preserves gonadal function, and supports fertility.

5000 IU

FST 344 Vial

Mechanism: Hormone that mimics Luteinizing Hormone (LH).

Benefits: Stimulates testosterone/sperm production in testes, preserves gonadal function, and supports fertility.

1mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

HEALING & RECOVERY PEPTIDES

BPC-157 / TB-500 Blend

Synergistic stack combining BPC-157 (Body Protection Compound) and TB-500 (Thymosin Beta-4).

Benefits: Accelerates healing and regeneration across soft tissues, ligaments, and joints.

5/5 mg

10/10 mg

BPC-157 – 60 Capsules

Mechanism: Promotes angiogenesis (new blood vessel formation) and modulates inflammatory cytokines.

Benefits: Accelerates tissue repair in muscles, tendons, and ligaments. Reduces inflammation. Supports gastrointestinal health.

500 mcg

BPC-157 / KPV Blend – 60 Capsules

Combines BPC-157's healing with KPV's anti-inflammatory action.

Benefits: Supports tissue repair while aggressively controlling inflammation, particularly in the gut.

500/500 mcg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

HEALING & RECOVERY PEPTIDES

TB-500 (Thymosin Beta-4) Vial

Mechanism: Active fragment of TB4 that binds actin, promoting cell migration.

Benefits: Accelerates healing of tendons/muscles, reduces inflammation, and minimizes scar tissue formation.

10 mg

KPV Vial

Mechanism: Tripeptide derived from alpha-MSH that inhibits NF-kappa B.

Benefits: Reduces inflammation, especially in the gut, and promotes wound healing.

5 mg

10 mg

KLOW (GHK-CU / TB-500 / BPC-157 / KPV) Blend

Advanced regenerative stack adding KPV (an anti-inflammatory tripeptide) to the GLOW healing matrix.

Benefits: Maximizes tissue repair while aggressively controlling inflammation.

50/10/10/10mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

HEALING & RECOVERY PEPTIDES

WOLVERINE (BPC-157 / TB-500 / MGF) Blend

Intensive healing stack engineered with BPC-157/TB-500 (healers) and MGF (muscle growth).

Benefits: Maximum tissue regeneration and muscle growth in damaged areas.

10/2.5/1 mg

CARTALAX Vial

Cartalax is a **short synthetic peptide bioregulator** (sequence AlaGluAsp, also called AED or T31) that is studied in **preclinical and laboratory research** for potential effects on **cartilage, joints, connective tissue, and cellular aging processes**.

20 mg

TERIPARATIDE Vial

Teriparatide (10 mg) is a **synthetic form of human parathyroid hormone (PTH 134)** and is an **FDA-approved medication** primarily used to **treat osteoporosis and improve bone health**. Unlike many research peptides, Teriparatide has established clinical use.

20 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

COGNITIVE / NOOTROPIC PEPTIDES

SEMEX Vial

Mechanism: ACTH derivative that triggers release of BDNF.

Benefits: Enhances focus/attention, promotes neurogenesis, and provides neuroprotection.

10 mg

SELANK Vial

Mechanism: Tuftsin analog that modulates neurotransmitters (serotonin/GABA) and inhibits enkephalin degradation.

Benefits: Reduces anxiety/stress, enhances cognition/memory, and provides neuroprotection.

5 mg

10 mg

20 mg

PINEALON Vial

Mechanism: Synthetic tripeptide that promotes expression of cell survival genes.

Benefits: Enhances cognitive function, supports neuroprotection, and aids recovery from neurological injuries.

10 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

COGNITIVE / NOOTROPIC PEPTIDES

CEREBROLYSIN Vial

Cerebrolysin 60 mg is a **neuropeptide-based drug** primarily used in research and clinical practice (in some countries outside the U.S.) for **neurological and cognitive disorders**. It is derived from **purified peptides and amino acids from porcine brain tissue**.

60mg

CORTAGEN Vial

Cortagen (Ala-Glu-Asp-Pro or AEDP) is a synthetic tetrapeptide—a type of Khavinson peptide—designed to **stimulate nerve growth, repair damaged nervous tissue**, and act as a powerful neuroprotective antioxidant.

20mg

P21 Vial

P21 (also called P021) is a **synthetic peptide derived from a small active fragment of ciliary neurotrophic factor (CNTF)**. It's engineered to be **more stable and able to cross the bloodbrain barrier** than the full CNTF protein, which is much larger and does not enter the brain easily.

10mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

LONGEVITY & ANTI-AGING PEPTIDES

NAD+ Vial

NAD+ is a critical dinucleotide coenzyme involved in cellular redox reactions and energy production. In research models, it facilitates ATP synthesis and acts as a substrate for sirtuins and PARPs. Studies investigate its role in mitochondrial function, DNA repair, and regulating metabolic homeostasis in various experimental systems.

500 mg

1000 mg

NAD ANTI-AGING GUMMIES

Sugar-free, vegan gummies are designed to support cellular energy and mitigating age-related decline pathways.

- 3,000mg of NAD
- 300mg of Resveratrol
- 300mg of Ginseng
- 300mg of TMG

EPITALON (EPITHALON) Vial

Mechanism: Pineal gland derivative that activates telomerase, influencing telomere length.

Benefits: Supports anti-aging, longevity, and regulates circadian rhythm/melatonin production.

10 mg

20 mg

30 mg

50 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

LONGEVITY & ANTI-AGING PEPTIDES

SS-31 Vial

Mechanism: Mitochondria-targeting tetrapeptide.
Benefits: Protects mitochondria, reduces oxidative stress, and supports longevity/cellular resilience.

10 mg

50 mg

MOTS-C Vial

MOTS-c is a mitochondria-derived research peptide consisting of 16 amino acids (Met-Arg-Trp-Gln-Glu-Met-Gly-Tyr-Ile-Phe-Tyr-Pro-Arg-Lys-Leu-Arg). Encoded within the mitochondrial 12S rRNA gene, MOTS-c plays a key role in cellular metabolism and mitochondrial communication. Preclinical studies suggest it activates AMPK (AMP-activated protein kinase), supports mitochondrial homeostasis, and influences glucose metabolism and insulin signaling pathways.

10 mg

HUMANIN Vial

Humanin is a **short endogenous peptide** (24 amino acids) originally discovered in the human brain. It is considered a **mitochondriaderived peptide (MDP)** and is naturally produced in cells to **protect against cellular stress**.

10 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

LONGEVITY & ANTI-AGING PEPTIDES

LIVAGEN Vial

Livagen (20 mg) is a **synthetic tetrapeptide bioregulator** (sequence **LysGluAspAla**, often abbreviated **KEDA**) developed within the Russian bioregulator peptide research tradition. It's studied in laboratory and preclinical research for its effects on **gene expression, liver function, immune modulation, and cellular aging processes.**

20 mg

PANGRAGEN Vial

Pancragen (20 mg) is a **synthetic tetrapeptide bioregulator** studied in laboratory and preclinical research for pancreatic and metabolic support.

20 mg

CARDIOGEN Vial

Cardiogen is a **synthetic tetrapeptide** with the amino acid sequence **AlaGluAspArg (AEDR)**. It belongs to a class of **bioregulator peptides** originally studied in research programs focused on tissue specific regulation — in this case, the **heart and cardiovascular system.**

20 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

LONGEVITY & ANTI-AGING PEPTIDES

PROSTAMAX Vial

Prostamax 20 mg is a research peptide bioregulator, most commonly described as the tetrapeptide LysGluAspPro (abbreviated KEDP).

20 mg

TESTAGEN Vial

Testagen is a short, synthetic bioregulatory peptide (often listed as LysGluAspGly, KEDG) that appears in scientific and peptide supplier literature for its potential effects on endocrine signaling and hormone regulation.

20 mg

VILON (VIOLIN) Vial

Vilon (20 mg) is a research peptide bioregulator — a very short synthetic peptide composed of just two amino acids (LysineGlutamate, abbreviated LysGlu) that has been studied mainly in laboratory and preclinical settings for its effects on gene expression, immune regulation, and cellular maintenance processes.

20 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

LONGEVITY & ANTI-AGING PEPTIDES

CHONLUTEN Vial

Chonluten is a **synthetic tripeptide bioregulator** developed from sequences found in bronchial mucosal tissue. The peptide is small (3 amino acids) and is studied for its ability to **modulate gene expression in cells** — particularly those in the lungs and respiratory tract.

20 mg

CRYSTAGEN Vial

Crystagen is a synthetic tripeptide (commonly listed as EDP — GluAspPro) developed as part of the Khavinson peptide bioregulator series, originally identified in thymus-derived extracts.

20 mg

CARDIOGEN Vial

Cardiogen is a **synthetic tetrapeptide** with the amino acid sequence **AlaGluAspArg (AEDR)**. It belongs to a class of **bioregulator peptides** originally studied in research programs focused on tissue specific regulation — in this case, the **heart and cardiovascular system**.

20 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

SKIN, HAIR & COSMETIC PEPTIDES

GHK-CU – 60 Capsules

Mechanism: Copper peptide that promotes tissue remodeling and enhances enzymatic reactions.

Benefits: Stimulates collagen/elastin production, accelerates wound healing, and supports anti-aging.

2 mg

GLOW (GHK-CU / TB-500 / BPC-157) Blend

Powerful trio combining GHK-Cu, TB-500, and BPC-157.

Benefits: Enhances collagen synthesis, accelerates wound healing, reduces inflammation, and supports tissue vitality.

50/10/10mg

AHK-CU Vial

AHKCu peptide is a **synthetic copperbinding tripeptide** (alaninehistidinelysine chelated with a copper ion) that researchers and formulators study mainly for effects on **hair follicles, skin regeneration, and tissue repair**.

100 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

LONGEVITY & ANTI-AGING PEPTIDES

MELANOTAN 1 Vial

Mechanism: Analog of alpha-MSH that binds MC1R to stimulate melanin production.

Benefits: Promotes tanning, protects skin from UV damage, and may enhance conscious awareness.

10 mg

MELANOTAN 2 – Vial

Mechanism: Analog of alpha-MSH that binds MC1R, MC3R, and MC4R receptors.

Benefits: Promotes skin tanning, enhances sexual arousal, and suppresses appetite.

10 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

IMMUNE-MODULATING PEPTIDES

THYMOSIN ALPHA-1 Vial

Mechanism: Thymus gland peptide that strengthens immune response by stimulating T-cells.

Benefits: Exhibits potent antiviral activity, suppresses chronic inflammation, and bolsters innate immunity.

5 mg

10 mg

VIP Vial

VIP is a naturally occurring peptide in the body that has multiple roles, especially in the **immune, digestive, and cardiovascular systems**. When administered therapeutically, its functions include **Immune System Modulation**

- Reduces excessive inflammation by downregulating pro-inflammatory cytokines.
- Supports regulatory T-cell function, helping to maintain immune balance.

10mg

LL-37 (CAP-18) – Vial

Mechanism: Antimicrobial peptide derived from cathelicidin.

Benefits: Combats bacterial/viral/fungal infections, supports wound healing, and modulates immune response.

5mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

SEXUAL HEALTH PEPTIDES

PT-141 Vial

Mechanism: Bremelanotide, acts on MC4R receptors in the central nervous system.

Benefits: Enhances sexual desire and arousal in both men and women.

10 mg

KISSPEPTIN-10 Vial

Mechanism: Neuropeptide that stimulates GnRH release in the hypothalamus.

Benefits: Regulates reproductive hormones (LH/FSH), enhances fertility, and supports sexual arousal.

10 mg

OXYTOCIN Vial

Mechanism: Peptide hormone synthesized in the hypothalamus.

Benefits: Promotes social bonding, enhances emotional well-being, and reduces stress.

10 mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

SLEEP & RECOVERY PEPTIDES

DSIP Vial

Mechanism: Neuropeptide that modulates neurotransmitters to promote delta wave sleep.

Benefits: Improves sleep quality, reduces stress/anxiety, and supports recovery.

5 mg

DREAM SLEEP GUMMIES

Sugar-free, vegan gummies are designed to support deep sleep cycles and age-related decline pathways.

Melatonin • Chamomile • L-Theanine

Benefits: Supports deep restful sleep, longevity, anti-aging, and metabolic optimization.

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

ANTIMICROBIAL PEPTIDES

LL-37 (CAP-18) – Vial

Mechanism: Antimicrobial peptide derived from cathelicidin.

Benefits: Combats bacterial/viral/fungal infections, supports wound healing, and modulates immune response.

5mg

Welcome to Ageless Peptides

Your Trusted Peptide Partner

At Ageless Peps, we specialize in providing premium peptides, clinical weight loss products and unmatched peptide education.

EXPERIMENTAL ANTI-CANCER / ONCOLOGY PEPTIDES

PNC-27 Vial

PNC-27 is a synthetic peptide developed as an anti-cancer agent. It's designed to target and kill cancer cells selectively while sparing normal cells.

5 mg

PNC-28 Vial

PNC-28 is a synthetic peptide designed for anti-cancer therapy, similar to PNC-27, but it works mainly by interfering with tumor cell survival mechanisms rather than directly forming membrane pores.

5 mg
